	<b>Question: Comments instructor or course</b>
Braver	Fascinating class and well organised. I think the work load is appropriate and beneficial.
Braver	The course was interesting and informative. There was a lot of material to cover for one semester. It would be awesome if this course was split between semesters or had multiple parts. Other than that, I enjoyed it.
Braver	The homework was really helpful. It reinforced important concepts. Dr. Braver's course was really interesting.
Braver	Dr.Braver is well-read and educated scholar in his area. His offering of such a topic which normally goes unnoticed in several other institutions of higher education is something worth acknowledging. His presentation of the subject matter is so organized and scaffolded , the selections of the material was great as well- as I feel many of the articles he directed us to well manifest scientific research and how arguments and thesis are made. Moreover, his limitless support and tireless work to make everything a grad student may need reflect high professionalism. In class , as much as he shows makes his scholarship available, he never forget to imply that he is human just like us and who cares about us. This is evident form asking about how our lives were going in general. Maybe one suggestion for future improvement is to have more shorterassignments rather than fewer longer ones. Wish we had 10 Bravers in the department.
Braver	Dr. Braver does a great job at breaking down linguistic terminology. I had no experience in linguistics before this course, and thanks to Dr. Braver, I was able to grasp the concept and apply it to the course.
